

How does **GC Pay** enhance my Sage 300 Construction and Real Estate?

Integrated Commitment Management

- Pushes Subcontract Commitments and Commitment Change Orders automatically.
- Protects original contract and previously billed values.
- Communicates instantly to ensure projects remain up to date.

Automated Payable Import

- Reduces time spent with data entry.
- Eliminates posting errors and omissions.
- Slashes processing time.

Instant Project Coordination and Validation

- Ensures contractors billing values never exceed Commitment amounts.
- Automates Compliance Tracking using Sage 300 Compliance.
- Provides required Lien Waivers based on Project Specifications.

What can the GCPay Integration for Sage 300 CRE do for me?

GCPay integrates with Sage 300 Construction and Real Estate

- Job Costs Module
- Accounts Payable Module
- Project Management Module

What GCPay Does:

- Pulls commitments to GCPay.com from Job Cost Module.
- Pulls APPROVED commitment change orders from Job Cost or Project Management.
- Validates current commitment amounts between GCPay.com and Sage 300 CRE.
- Pushes approved applications for payment to Accounts Payable.
- Allows reallocation of staffing hours required for data entry.

How GCPay Integration Reduces Construction Risk:

- Ensures project reports and financials are accurate and available on demand.
- Controls change orders ensuring only APPROVED change orders are billable by contractors.
- Eliminates stacks of paper by providing automated notifications to project management team.
- Requires industry standard or company required forms from all contractors.
- Enhances subcontractor compliance requirements, forcing contractors to provide required documents prior to submissions.
